communicated with the property owner and architect regarding the location of the swale and rain garden. She stated that the property owner is aware that if the pillars and generator are being proposed to be placed in the Village’s easement and that the Village will not be responsible for repairing or replacing them if the Village needs to access the easement. President Barkemeyer noted the equestrian easement on the property. Village Manager Lasday inquired whether a Certificate of Liability Insurance would be required. Village Counsel Filippini stated that a Certificate of Liability Insurance would not be required as the easement is not in the Village’s right-of-way. stated that the Village has, as a matter of policy, requires residents to cap their well when coming onto the Village’s water system because of the risk of cross-contamination and that Illinois Department of Natural Resource’s water allotment is based upon residents using public water which could result in the Village violating IDNR’s regulations. Village Administrative Assistant Vela-Schneider noted that it has always been encouraged to terminate well use to help preserve the water table for municipalities in western communities who do not have access to lake water.
