Trustee Orth inquired about “portal to portal” transportation costs. He stated that he feels that Urban Forest Management should compromise on this fee. Trustee Korer inquired whether this is normal. Village Administrative Assistant Vela-Schneider stated that this has been a standard service charge for over a decade. Village Finance Director McCulloch noted that Urban Forest Management tries to lump together reviews to avoid overcharging. Village Manager Lasday stated that she would speak with Urban Forest Management to see if they would be willing to consider splitting the transportation costs. President Barkemeyer also requested that Urban Forest Management review Emerald Ash Borer (EAB) infested trees on right-of-way and Village Property. Trustee Korer stated that he feels that the rate is too low as the filming crews have a greater impact in the Village of Bannockburn than in other communities. Trustee Rothing agreed. Village Counsel Filippini stated that the Village could justify an increased rate due to the greater displacement on the Village's small staff and the associated cost associated with having a film crew in the Village and impacting Village roads. He suggested that the proposed rate could be increased by 25%. The Board discussed acceptable timeframes for filming. Trustee Orth stated that there becomes a point in time when lengthy filming processes become a burden to the Village. Trustee Orth moved, seconded by Trustee Boyle, to approve a resolution approving a General Policy for film productions in the Village of Bannockburn, with final amendments provided by Village Counsel Filippini and Village Manager Lasday. On a roll call vote, Resolution 2012-R-28 was unanimously approved. Ayes: Five (Alch, Boyle, Korer, Orth, Rothing), Nays: None, Absent: One (Fisher).

Village Engineer Gewalt replied that the break did not occur in the location that the Village intends to replace. He stated that the break was a catastrophic failure that was extra deep and required an extra wide piece of pipe to extend past the joint. He noted that the area that the break occurred is in an area that was replaced a few years ago. He stated that it should have not occurred but there may have been some type of manufacturer defect of the pipe that was visible. He stated that because the work occurred several years ago, there is no recourse for the Village. *LifCo Pay Requests. He stated that some residents have already begun to fix the problems. He stated that he does not have a complete summary of all the problems located. He also noted that several residents had smoke inside of the house due to broken seals on sump pumps. President Barkemeyer stated that the company who performed the work seems to be more efficient in identifying problems than in the past. Village Engineer Gewalt stated that the company provided more concentrated levels of smoke and had more manpower to identify areas of concern. *Tarns of the Moor. Village Engineer Gewalt reported that patching and paving occurred over the last week on the Tarns of the Moor road. He stated that he will be conducting a final inspection of the paving work during this week. Trustee Korer inquired about whose responsibility is the waterfall feature. Trustee Korer inquired what the Village can do to ensure that the pumps are repaired and stay in working order. Village Counsel Filippini stated that if the pumps are not repaired or not maintained, the Village can send a notice to the Homeowner’s Association of its intent to complete the repairs and bill it to the Homeowner’s Association and if unpaid, lean the Homeowner’s Association. He stated that the Village needs to make sure that the infrastructure is in pristine shape before the Village accepts it. He stated that this is also a good opportunity to ensure that all other items that will be the responsibility of the Homeowner’s Association are being well maintained. Trustee Korer inquired whether the Homeowner’s Association is aware of their responsibilities. Village Counsel Filippini stated that it might be useful for the Village to send a letter to the Homeowner’s Association detailing their responsibilities as well as the Village’s responsibilities. *Village’s Water Valves. President Barkemeyer suggested that the Village exercise the water valves this year. Village Engineer Gewalt stated that the valves along Half Day Road have been exercised or replaced as part of the Route 22 Widening Project. Village Engineer Gewalt suggested that DeMuth do the work in case repairs are needed. *Stirling Road/Valley Road Restoration. Upon inquiry from Trustee Rothing, Village Engineer Gewalt stated that he will need to contact Greg Greenhill to see if they are still in business and intend to complete the final restoration. Village Finance Director McCulloch stated that Greg Greenhill still needs to sign change orders as part of the ARRA (American Recovery and Reinvestment Act) Bonds. Trustee Rothing requested that Village Engineer Gewalt contact Greg Greenhill immediately to see if the area can be seeded in September or October. Village Finance Director McCulloch expressed concern regarding compliance with the Village’s bid requirements and ensuring that whoever the Village hires to complete the restoration complies with Davis Bacon regulations. *1000 Lakeside Drive Agreement. Village Manager Lasday inquired whether the Village has secured written authorization for the grant work that will occur at 1000 Lakeside Drive. Village Engineer Gewalt replied that he has not received written authorization. Village Manager Lasday noted that Walgreen’s no longer wishes to be on the ordinance regarding exterior parking and lighting. Village Counsel Filippini stated that
Walgreens made representation that they were acting on behalf of the owner and the tenant.
